Hello!

It is with a real pleasure that we contact you this day to offer to you our services in the supply and the installation of the solutions of telecommunication and Internet.

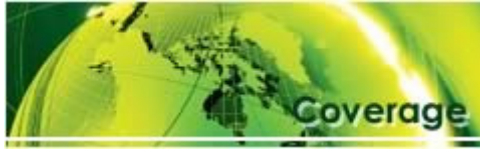

Surfcom is based in ACCRA and CANADA and we are operating a shared HUB at Fuschadt Mediaport with Intelsat (Ku-Band and C-Band) on INTELSAT IS-907 (Ku-Band). Our 3 satellites network (IS-907; Pas-1R; AMC12) ensures a perfect coverage of Africa

Our strong establishment and implication with the projects of development of the areas of the "South", our competences as well as the reliability of our solutions and services makes us to be the indicated partner.

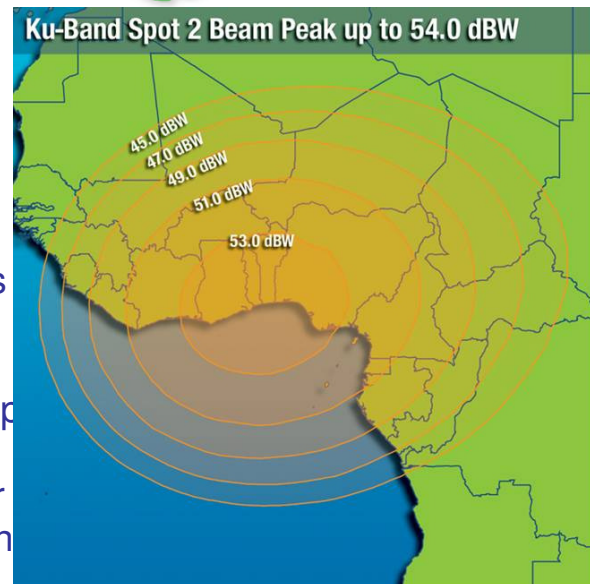

Our prices are the best; you will find more option and of information on this subject up on request at the following address:
vsatsupport@surfcomgh.com

The best network

With its multi satellite network **SURFCOM CANADA** Insure coverage of the whole world. Africa is entirely covered in KU-Band as well as in C-Band with the best quality of service. Operating shared HUB with INTELSAT constitute a major advantage for your business. This backup solution on different satellite makes us be among the best suppliers with the best network. Our satellites are prone to a permanent follow-up and monitoring. Three levels of engineers take care 24/7 of operations in order to optimize their performances thus and reinforce the quality of the provided services.

SURFCOM CANADA Is the best network

Best customer care service 24/7
